

My final project will be a website called The Spider Hospital, based on a children's short story I wrote years ago.

The purpose of the site is to share the idea of a Spider Hospital, a fictional place that cares for spiders with broken legs and tries to educate both spiders and humans on keeping spiders safe from harm. I hope children and adults like it and share it with others.

I'm not sure yet if I'll use Wordpress, but I plan for the site to have the following:

- Bootstrap
- CSS animation
- Carousel of images
- JavaScript
- JQuery
- Scroll Reveal

Possible additional apps:

- Contact Form 7 – supposedly a cool contact form
- Cookie Law Info – user info
- WP Post Views – showing number of visitors to site
- map

Please see the attached Final Project Layout pdf for visual mock up.
